

The better life

MEDIKIT

The better life

About Us

Company

With more than 30 years in manufacturing and marketing critical care products across 65 countries, Global Medikit consistently provides practical solutions to healthcare problems. We identify need gaps and create new service touch points by pioneering innovative medical disposables for your needs.

Why our customers always stay with us?

We believe in fostering relationships with a lasting impact and recognize customer satisfaction as integral to the larger business cycle. It inspires us to adopt a more customer-centric approach in our deliverable management processes and thereby acquire, retain, and grow our business. Above all, it enables our customers to put their faith in us and create bonds that develop into lasting relationships over the long haul.

Our USP: Painless patient experience

We develop painless solutions that define a better approach towards diagnosis and treatment in hospitals. Our patient friendly state of the art devices guide medical professionals to deliver a painless experience to patients.

Global Distribution Networks

Wherever you are, we're never away

Our healthcare solutions are accessible to customers in over 65 countries. We have extensive distributor networks in the Americas, Europe, Africa, the Middle East, South East Asia and Russia. We strive to shape the global healthcare landscape with innovative, cost-effective solutions.

Diverse Product Range

One Stop Shop

The versatility of products in our potpourri can be baffling, thanks to our innovation-driven approach that hones our capability to meet patient needs across the world. You can count on us as a one-stop shop for top-notch medical disposables delivered to your doorstep. We endorse on-time delivery and our after sales support infrastructure is one of the strongest in the industry. Want to put us to the test? Try our samples.

Quality Control and Efficient Manufacturing

To ensure the best quality in medical devices, we deploy a complex combination of cutting edge tools, robotics and statistical process controls in our process mechanisms. Global Medikit's manufacturing plant is a high tech amalgamation of avant-garde HVAC systems, HEPA filtration, positive pressure, controlled temperature and regulated relative humidity systems working in sync with systemically controlled environments.

I.V. Catheter with Injection Valve and Wings

Possesses all features of a standard intravenous catheter.

- Stainless steel, silicone tipped needle for smooth penetration.
- Injection port with one way silicone injection valve.
- Specially designed protection cap with a recessed plug to cover the injection port and minimize contamination.
- Angled and grooved wings for secure fixation.
- Radio-opaque lines for accurate radiographic detection.
- Luer cap for blocking the catheter when not in use.
- 6% luer taper for compatibility with all standard devices.
- Disposable, sterile and non-pyrogenic.

Medican™

I.V. Catheter without Injection Valve and with Wings

I.V. Catheter useful in patients carrying highly infective diseases to minimize transmission of infection.

- Projection on main body for two point grip and easy insertion.
- Streamlined design provides minimum area of contact with the body.
- Maximum needle catheter clearance for minimal peel back effect .

Medican Alpha Safety™

Safety I. V. Catheter without Injection Valve and without Wings

Common features and benefits:

1. Biocompatible radio-opaque catheter for easy insertion and X-ray detection.
2. User friendly, self-activating safety mechanism.
3. Needle safety guard automatically covers the bevel after withdrawal of needle from the hub, minimizing the risk of needle stick injuries.
4. Easy identification of needle safety guard after covering needle tip due to color coding of needle hub.
5. Cannulation technique similar to conventional I.V. Catheter.
6. Stainless steel, siliconized needle for easy and smooth penetration.
7. Robust, evenly, sharp, triple faceted beveled needle ensures least trauma and reliable insertion.
8. Color coded body (housing) is provided for easy identification of gauge size.
9. Ergonomically designed luer lock facilitates instant secure closure immediately after penetration.
10. Transparent flashback chamber for easy visualization of blood.
11. Sterile, non-pyrogenic, for single use.
12. Individually packed in blister pack.
13. Available in FEP/PTFE/PU catheter.
14. Qty. in carton (Inner/Master) – 100/1000.

Neocan™

I.V. Catheter with Wings for Neonates

Miniature IV catheter with a small, fine and smooth design for use in infants (children below 1 year of age) and neonates (children below 1 month of age).

- Small wings and absence of injection port permits easy handling.
- Large internal diameter for increased flow rate and reduced peel back effect.
- Siliconized needle tip for atraumatic tissue penetration.
- Transparent flashback chamber for easy visualization of blood.
- Available in size 24G.
- Disposable, sterile and non-pyrogenic.
- Sealed blister packing.

Medicath™

I.V. Catheter with an integrated three-way stopcock

Ports of the stopcock can be utilized for attaching additional stopcocks for multiple infusion therapy.

- Colour coded tap for easy identification.
- Flexible wings with suture holes for secure fixation.
- Luer lock stoppers to prevent contamination.
- 360° rotation of the tap without limitation.
- Rigid and sturdy design for longevity.
- Female luers with 6% taper for compatibility with all standard devices.
- Disposable, sterile and non-pyrogenic.
- Sealed blister packing.

Mediflex®

Three-way stopcock

Three way stopcock made of polycarbonate

- Multiple channels for multiple infusion therapy.
- Designed to withstand pressure upto 5 bars.
- Smooth, fully rotatable tap.
- Stability tested pneumatically and hydrostatically.
- Tap turns every 360° without limitation.
- Flow shuts off every 90°.
- Minimal dead space in ports to ensure precise drug administration and maximum infusion flow. Continuous flow channels.
- Arrow indication marks on top to indicate direction of flow.
- Low profile for stable and safe positioning.
- Available in lipid resistant/non-lipid resistant varieties.
- Available with blue and red pegs for easier identification.
- Disposable, sterile and non-pyrogenic. Sealed blister packing.

Extension tubing with 3 way Stop cock

Three-way stopcock with an integrated extension tubing for minimizing manipulation during intravenous administration of fluids/drugs through an I.V. Catheter.

- Minimizes chances of mechanical irritation and infection by taking.
- The administration site away from insertion site.
- The integrated three-way stopcock offers multiple infusion lines.
- Smooth internal surface to minimize turbulence.
- Disposable, sterile and non-pyrogenic.

Medilinn™

Extension line with needle free valve

FEATURES & BENEFITS:

- Small bore multiple extension sets.
- Needleless luer access ports provides virtually zero residual volume and high flow rates.
- Medilinn™ is light weight with an easy rotating luer lock which reduces the chances of pulling and kinking.
- Designed for multiple drug delivery.
- Valve features a straight-through, minimal dead space.
- Use of Medilinn™ reduces the chances for catheter/cannula related complications and improves the patient comfort.
- Low priming volume enable small-volume infusions.
- Silicone sealing membrane with slide clamp.
- Available in uno, duo, trio.
- **DEHP free.**
- Latex free.

USAGE:

Medilinn™ is designed to meet the needs of general I.V. therapy.

The ability of needle free connector is to prevent contamination of fluid path.

Technical specifications

Valve	Total length of Set	Approx. Priming volume (ml)	Ref. No.	Qty. Inner / Outer
UNO (1 way)	15 cm	0.25 ml	4280101	50 / 500

TRIO (3 way)	15 cm	0.80 ml	4280105	50 / 500

I.V. Fluid Flow Regulator Extension Set

I.V. Fluid Flow Regulator Extension Set to regulate the flow of IV fluid from an infusion set into an IV catheter.

- Designed to control flow rate from 5ml/hr – 300 ml/hr manually.
- Built-in Y-connector injection site for extra medication.
- Two hand operation eliminates the danger of accidental tampering.
- Provision of male and female luer lock makes it compatible with other devices.
- Disposable, sterile and non-pyrogenic.

Technical Specifications

Product specification	Tubing Length (cm.)	Packing	Ref. No.	Qty. in carton Inner/ Outer
I.V. fluid extension set with Graduated flow regulator and Y-site	45	Soft Blister	4660012	20/240

Low Pressure Extension Tubing

Extension Tubing for making administration of IV fluids more convenient.

- Made from medical grade PVC.
- Minimizes the movement at the cannulation site by taking the fluid administration site away from the insertion site.
- Smooth internal surface to minimize turbulence.
- Disposable, sterile and non-pyrogenic.

Medidrip Alpha®

Disposable Infusion set with built Bacteria Barrier Air vent

IV infusion set with an airvent integrated above the drip chamber to allow adequate pressure inside the chamber for smooth, uninterrupted fluid flow.

- The airvent is fitted with a bacterial filter with snap cap to keep out the air borne pathogens.
- Flexible dripchamber to facilitate rapid adjustment of fluid.
- Sharp, sleek spike with vents to allow effortless penetration into the IV solution bag.
- Moulded, self sealing latex bulb at distal end for intermittent medication.
- Hypodermic needle attached to the male luer to prevent contamination.
- Soft, kink resistant tubing.
- Disposable, sterile and non-pyrogenic.
- Option of Y-Injection site.

Infusion

Flovi®

I.V. Infusion set with Airvent and Y-Site

I.V. infusion set with an airvent with bacterial filter integrated above the drip chamber to allow adequate pressure inside the chamber for smooth, uninterrupted fluid flow.

- Large clear, transparent Flexible drip chamber to facilitate rapid adjustment of fluid.
- Large Sharp, sleek spike with vents to allow effortless penetration into the IV solution bag.
- Y-site at distal end for intermittent medication.
- Hypodermic needle attached to the male luer to prevent contamination.
- Soft, frosty, kink resistant tubing.
- Disposable, sterile and non-pyrogenic.

Technical Specifications

Product Specification	Needle Size	Drops per ml.	Tubing Length (cm.)	Packing	Ref. No.	Qty. in carton Inner/ Outer
I.V. Infusion set with airvent with Y-site with DEHP FREE tubing and with small roller clamp	21Gx1.5"	20	150	Paper Pouch	4170043	25/500

I.V. Fluid Infusion Set with Flow Regulator

Intravenous fluid infusion set with Flow Regulator to regulate the flow of IV fluid.

- Designed to control flow rates from 5 ml/hr – 300 ml/hr manually.
- Sharp, spike for easy insertion.
- Roller clamp for regulating fluid flow rate.
- Self sealing latex bulb for drug administration.
- Disposable, sterile and non-pyrogenic.

Technical Specifications

I.V. Infusion set with airvent, Y-site, DEHP FREE tubing, Graduated flow regulator and small C-clamp	20	150	Paper Pouch	4190011	25/350

Medimic™

Micro Drip Disposable Infusion Set

- Sharp, spike for easy insertion.
- Roller clamp for regulating fluid flow rate.
- Kink resistant 150 cm long PVC tubing.
- Self sealing latex bulb for drug administration.
- Disposable, sterile and non-pyrogenic.
- Option of Y-Injection site.

Technical Specifications

Infusion

Medimic Alpha™

Microdrip Disposable Infusion set with built in Bacteria Barrier air vent

- The airvent is fitted with a bacterial filter with snap cap to keep out the air borne pathogens.
- Flexible drip chamber to facilitate rapid adjustment of fluid.
- Sharp, sleek spike with vents to allow effortless penetration into the IV solution bag.
- Hypodermic needle attached to the male luer to prevent contamination.
- Soft, kink resistant tubing.
- Disposable, sterile and non-pyrogenic.
- Option of Y-injection site.

				Paper pouch	4480017	

Medidial®

Sterile Microdrip Disposable Infusion set

FEATURES

I.V. Infusion set with micro drip and dial flow controller

- Sharp sleek spike with vent to allow effortless penetration into the iv solution bag.
- Flexible drip chamber to facilitate rapid adjustment of fluid.
- Soft kink resistant tubing DEHP Free.
- The air vent is fitted with a bacterial filter with snap cap to keep out the air borne particle
- Disposable sterile and non-pyrogenic.
- Designed to control flow rates from 5ml/h -275ml/h manually.
- C-Clamp for closing the flow.
- Approx 60 drop/ml.
- Latex free & **DEHP Free**.
- Male luer lock.
- Y-injection site.

Product specification	Drops per/ml.	Tubing length (cm)	Packing	Ref. No.	Qty in carton (Inner/Outer)
Micro drip infusion set with air vent, dial type graduated flow regulator "Y-Site" luer lock and with clamp	60	150	Soft blister	4440016	10/100

Medivols®

Measured Volume Burette Fluid Infusion Set

IV infusion set with a well marked drip chamber for precise fluid administration.

- Flexible graduated burette with marking upto 110/150 ml.
- Sharp bevelled, smooth spike for easier penetration.
- Air inlet with bacterial filter and injection port.
- Disc filter inside the drip chamber for adequate filtration.
- C-clamp for regulating the rate of fluid infusion to the patient.
- Soft roller clamp for regulating the rate of fluid infusion to the patient.
- Kink resistant tubing with self sealing latex bulb for extra medication.
- Options of latex bulb/Y-shaped bulb; luer slip/luer lock rotator; vented spike/bevelled spike.

Technical Specifications

Product Specification	Burette Capacity (ml.)	Needle Size	Drop per ml	Tubing length (cm)	Packing	Ref. No.	Qty. in carton Inner/ Outer

	150	23Gx1.0"	60	150	Ribbon pouch	4371501M	10/100 25/100

Medibob®

Blood Administration Set

Transfusion set specially designed to transfuse blood.

- Strong, sleek and sharp spike with airvent to puncture blood bag outlets.
- Drip chamber with filter mesh to keep out blood clots from entering the patient's circulation.
- Regulator clamp to control transfusion rate.
- Kink resistant, soft, PVC tubing.
- Injection site to administer medication.
- Available in Single-drip/Double-drip chamber variants.
- Options of Latex bulb site/Y-injection site; Luer-slip/ Male-rotator variants.
- Disposable, sterile and non-pyrogenic.

Technical Specifications

Product Specification	Needle Size	Drops/ml.	Length of the set (cm.)	Packing	Ref. No.	Qty. in carton Inner/ Outer

Infusion

Haemodialysis Kit™

FEATURES:

- Haemodialysis catheter are single/double/multiple lumen catheter that provides temporary vascular access for haemodialysis until a permanent access is available or until another type of dialysis therapy is substituted.
- The multiple lumen catheter contains two large bore lumens that are connected to the dialysis machine to form a complete circuit for the removal and return of the patient's blood during treatment.
- Kink resistant J-tip nitinol guide wire.

Medifin™

A.v. Fistula Needle Set

Needles for use in patients on haemodialysis

- Needles for use in patients, silicone tipped needle for atraumatic insertion.
- Back eye for uninterrupted blood flow through the needle.
- Rotable wings for firm grip, easy turning and secure fixation.
- Smooth Geometry for laminar blood flow.
- Modified hub design with black mark for positioning the bevel accurately.
- Kink resistant tubing with smooth occlusion clamp.
- Color coded wings for identification for needles size.
- Option for single/Twin Fistula needles.
- Disposable, sterile, non pyrogenic.

Critical

Centum® Uno

Single Lumen Central Venous Catheter (Seldinger technique)

Centrally inserted, single lumen central venous catheter.

- For administration of hyperosmolar solutions, measuring CVP, haemodialysis, plasmapheresis, rapid infusion of fluid among other uses.
- Centum® provides the benefit of polyurethane catheter which is soft, kink resistant, extremely biocompatible with excellent wear properties and elastic memory.
- Kink resistant J-tip nitinol guide wire.

Centum® Duo

Double Lumen Central Venous Catheter (Seldinger technique)

Centrally inserted, double lumen central venous catheter.

- For administration of hyperosmolar solutions, measuring CVP, haemodialysis, plasmapheresis, rapid infusion of fluid among other uses.
- Centum® provides the benefit of polyurethane catheter which is soft, kink resistant, extremely biocompatible with excellent wear properties and elastic memory.
- Two separate non-communicating vascular access lumens within a single catheter body.
- Proximal lumen for blood sampling, medications and blood administration.
- Distal lumen for CVP monitoring, blood administration and medication.
- Reduces the necessity for multiple venipunctures.
- Exit ports of individual lumens are separated by appropriate distance in proportion to the catheter's French size.
- Coaxial catheter design maximizes inner diameter of central lumen for high flow capacity.
- Disposable, sterile and non-pyrogenic.
- Sealed blister packing.
- Kink resistant J-tip nitinol guide wire.

Centum® Trio

Triple Lumen Central Venous Catheter (Seldinger Technique)

Centrally inserted, Triple Lumen Central Venous Catheter

- For administration of hyperosmolar solutions, measuring CVP, haemodialysis, plasmapheresis, rapid infusion of fluid among other uses.
- Centum® provides the benefit of polyurethane catheter which is soft, kink resistant, extremely biocompatible with excellent wear properties and elastic memory.
- Three separate non-communicating vascular access lumens within a single catheter body.
- Proximal lumen for blood sampling, medications and blood administration.
- Distal lumen for CVP monitoring, blood administration, medications.
- Medial lumen exclusively for total parenteral nutrition.
- Reduces the necessity for multiple venipunctures.
- Exit ports of individual lumens are separated by appropriate distance in proportion to the catheter's French size.
- Coaxial catheter design maximizes inner diameter of central lumen for high flow capacity.
- Disposable, sterile and non-pyrogenic.
- Sealed blister packing.
- Kink resistant J-tip nitinol guide wire.

Single Lumen Central Venous Catheter (through Catheter technique)

Peripherally inserted Single Lumen Central Venous Catheter.

- For long term venous access, central venous pressure (CVP) monitoring, infusion of irritant medication, temporary pacing, hemodialysis/plasmapheresis etc.
- Specially coated, flexible polyurethane catheter.
- Removable stylet adds rigidity to the catheter during insertion.
- Extremely bio-compatible, soft and knik resistant catheter.
- Thromboresistant and fat resistant.
- Full length, four radio-opaque lines for accurate radiographic detection.
- Insertion depth marking every 5 cm to determine exact catheter position.
- Smooth tip aids atraumatic insertion.

Epidural Mini Pack™

Epidural Catheter Set

Kit contains Epidural Needle and Epidural Catheter of Corresponding size.

- Specifically designed kink resistant yet structurally strong catheter with flexible tip making catheter placement convenient.
- Risk of inadvertent dura puncture or vessel rupture are markedly reduced with soft and flexible catheter tip.
- The uniquely designed coil reinforced body is the mainstay of its structural strength and makes the catheter non collapsible for long periods. Smooth exterior and inner helix platform makes maneuverability easy and imparts radio opaque property to the catheter.
- Calibrated catheter depth marking make the placement exact and the colored catheter tip makes intact catheter depth marking make the placement exact and the colored catheter tip makes.
- Each 10 mm, beginning at 10 mm from the tip, up to 250 mm.
2, 3, 4, 5 points, 2.5 mm each are located at 100, 150, 200, 250 mm from the tip respectively.
- Non-collapsing holes near the tip makes drug dispersion uniform.
- Also contains specially designed filter disc with screwed connection for easy fit.

Medispine®

Spinal Needle

Intended for spinal (sub Arachnoid) anaesthesia.

- Ultra fine quincke tip for better dura puncture appreciation and to prevent post dura puncture headache.
- Color-coded hub-stylet (International standard) for fast detection of the needle size.
- Optimal sized stylet prevents tissue coring and obstruction of the needle size.
- Transparent hub for fast detection of CSF.
- Needle length 3.5".
- Sterile for single use only.
- Made of superfine surgical steel.

Endotracheal Tube (Plain)

Tubular device designed to be inserted into the trachea through the oral/nasal cavity to secure the airway and maintain the gas exchange in the lungs.

- Made from non-toxic, clear, transparent, thermoresistant medical grade PVC (Polyvinyl Chloride).
- Fitted with standard 15 mm connector for attachments to all standard ventilatory circuits in operation theaters or intensive care units.
- Graduated markings to display distance from the tip.
- Well marked to indicate the internal/external diameter.
- Nasoral tip suitable for both nasal and oral intubation.
- Full length radio-opaque lines to assess position of the tube radiographically.
- Murphy's eye near the tip to circumvent any obstruction.
- Disposable, sterile, non-pyrogenic.

Suction Catheter

- Suction Catheters are suitable for removal of secretion from mouth, trachea and bronchial tubes.
- Manufactured from non-toxic non-irritant medical grade PVC.
- Distal end is open with one lateral eye.
- Colour coded for instant size identification.
- Provided with universal funnel shape connector for safe connection to standard suction equipment.

Technical Specifications

Size (FG)	Colour of funnel	O.D. Catheter (mm.)	Ref. No.	Qty. in carton Inner/ Outer
6	Light Green	2.00	5020065	50/450
8	Blue	2.67	5020085	50/450
10	Black	3.33	5020105	50/450
12	White	4.00	5020125	50/450

Mediciser®

Respiratory Exerciser

Helps to develop, improve and maintain respiratory fitness.

- Useful in restoring and maintaining lung capacity of post operative ambulatory and COPD patients.
- Improves respiratory parameters, maximal exercise capacity and overall cardiopulmonary status.
- Air filter for enhanced protection.
- Transparent, well calibrated chambers for accurate estimation of exercise capacity.
- Soft, aesthetically coloured inspiratory tubing.
- Colour coded triple ball design for proper visual feedback.
- Sleek, stable design.

Technical Specifications

Product Specification	Ref. No.	Qty. in carton Inner/Outer
3 ball model	6040011	1/50

Medi-O-Mask™

Oxygen mask

Transparent OXYGEN MASK meant to administer oxygen to patients.

- Made from special non-toxic medical grade PVC.
- Two holes to allow carbon dioxide exhaled by the patient to escape.
- Nasal clip for secure fixation over the patient's nose.
- Elastic band for placement around the head.
- Transparent tubing to connect the mask to the oxygen source.

Technical Specifications

Product Specification	Type	Ref. No.	Qty. in carton Inner/ Outer
with tubing and nose clip	Adult	6080021	20/200
	Child	6090021	20/200

Medimist™

Nebuliser Kit

FACE MASK with an integrated NEBULIZER CHAMBER for nebulizing patients.

- Transparent mask (with holes) made from non-toxic, medical grade PVC.
- Nebuliser chamber (6ml) to house the drug in liquid form with a funnel shaped vent to allow oxygen at high flows to convert the liquid drug into droplet form to reach the lungs.
- Soft, kink resistant, 200cms long non-collapsible extension tubing (STAR LUMEN) to be connected with the oxygen source.

Technical Specifications

Product Specification	Type	Ref. No.	Qty. in carton Inner/ Outer
with tubing, face mask and nose clip	Adult	6110022	10/200
with tubing and nose clip	Child	6120022	10/200

Mediwin™

Twin Bore Nasal Oxygen Set

- Suitable for easy and efficient administration of oxygen.
- Star lumen main tube to avoid accidental blockage.
- Soft and kink resistant PVC. Tubing.
- Soft twin prong nasal tips to ensure equal distribution of oxygen through both air passages which provides maximum patient comfort.
- Non-sterile
- Tube length: 210cm

CHILD	4.90	2.00	210	6170011	25/400

Mediyan®

Yankauer Handle with Connecting Tube

Suction of oral cavity and surgical field.

- Rigid, angled, one-piece design, made from clear, medical grade PVC.
- Edges are smooth and clean. It has a bulbous tip and ribbed at proximal end to provide perfect grip.
- Clear tips permit visual monitoring of suction fluids.
- Connecting tubing with optimal draping qualities for maintaining a wall thickness to resist the most rugged environments.
- Used to clear copious and thick secretions and vomitus from oro-pharyngeal cavity and suction fluids and blood to provide clear surgical field.
- Disposable, Sterile, single use.

Technical Specifications

Product specifications	Tube length	Ref. No.		Qty. in carton Inner/ Outer
		Plain tip	Crown tip	
Suction tube with Crown & Plain tip	8.2 ft.	5310011	5310061	10/100
	9 ft.	5310021	5310051	10/100
	10ft.	5310031	5310071	10/100
	12ft.	5310041	5310081	10/100

Respiratory Care

Surgery

Mucus Extractor

Used for aspiration of secretion from oropharynx in newly born babies to ensure free respiration.

- Clear transparent container permits immediate visual examination of the aspirate.
- Also suitable for obtaining mucus specimen for microbiological examination.
- Spare plug cap is provided to seal the container for safe transportation of specimen to the laboratory or aseptic disposal of container.
- Low friction surface catheter is provided with open end silk smooth round tip, for trauma free insertion.
- Manufactured from transparent medical grade PVC. Sterile ready for use.

14FG	 Green	25ml	5050145	25/350

Medifant®

Infant feeding tube

Provide feedings and medications into the stomach.

- Manufactured from soft, Non Toxic, medical grade PVC.
- Distal end is coned with two lateral eyes.
- Proximal end is provided with female luer mount for easy connection to feeding syringe.
- Tube with radio-opaque line.
- Smooth, low friction surface facilitates easy introduction.
- Disposable, Sterile, single use.

Mediryle®

Ryel's Tube

- Made of Soft, frosted and kink resistant PVC tubing.
- Tube with radio-opaque line, marked at 50, 60 and 70 cms from the tip for accurate placement. Four lateral eyes for aspiration and administration.
- Manufactured from Non-toxic, Non-irritant medical grade PVC.
- Smooth, low friction surface facilitates easy introduction
- Disposable, Sterile, single use.

Thoracic catheter

- Suitable for effective drainage after Cardio-Thoracic & thoracic Surgery.
- Atraumatic & rounded open distal end with smooth eyes.
- With radio-opaque line and marking at every 2 cm from the last eye.
- Sizes: 16,20,24,28,32 & 36 FG
- Soft, frosted and kink resistant PVC Tubing -Matching size connector for easy connection to the drainage system.
- Proximal end is fitted with pull through tapered tongue.

THORACIC CATHETER

Medidrain®

Wound Suction Drainage System

- Suitable to offer surgeons and doctors an effective device for close wound drainage under negative pressure post operatively with the option to use one or two catheters simultaneously.
- Graduated bellow container.
- Redon drain catheters are provided with radio opaque line and satin smooth eyes.
- Connecting tube is kink resistant and is provided with additional strength to withstand the suction.
- Easy to depress chamber to activate the suction of bellow unit by one person.
- Available with different catheter sizes with matching size curved needle to meet moderate to heavy drainage needs.

Unit consists of

- Bellow unit.
- Connecting tube with clamp and "Y" connector.
- Curved needle with matching catheter.
- Spare perforated catheter.

Type Bellow Capacity

- 800 ml.

Supplied As:

- Complete unit packed in a box.
- Sterile, ready for use.

Surgery

Nelaton Catheter

The single-use catheters are exclusively suitable for short term use.

With its 40 cm length, the Nelaton Single-Use Catheter is ideally suitable for males.

- **Atraumatic urine drainage** Sanitised, medical
- PVC and two rounded-off eyes positioned at the side ensure an optimal sliding quality and care for the sensitive tissue.
- **Fast size identification** The colour-coded funnel insert of the single-use catheter provides for a fast and certain identification of the sizes.
- Atraumatic eyes.
- Individually packed in sterile packaging.
- Transparent PVC providing full urine visibility.
- Contains no pyrogens and no latex.

MEDIKIT

The better life

GLOBAL MEDIKIT IN BRIEF

GLOBAL MEDIKIT TEAM

The **Global Medikit** team offers operational experience, engineering solutions and materials research in the field of medical devices. The strong Global Medikit team of engineers, scientists, biochemists and operators work 24/7 to bring you the cutting edge medical device technology.

One of the hallmarks of the **Global Medikit** evolution as a major medical equipment manufacturer and exporter is the in-house development of proprietary equipment, manufacturing processes and techniques. This capability housed in our design and development centre, enables us to offer production answers to sometimes seemingly impossible challenges. **Global Medikit** is in other words, not only a resource for stringently controlled manufacturing, but also an innovation institute.

Global Medikit operates its manufacturing activities at Dehradun, Uttarakhand, India. Advantageous a pollution free industrial zone have been the key factors for concentrating the activities there. Each clean room has state of the art HVAC system HEPA filtration, positive pressure, controlled temperature and regulated relative humidity systems in place which provide a conducive environment for manufacturing.

GLOBAL MEDIKIT R & D

Our research and engineering team functions in a number of capacities : design, development and refinement of products and processes. Our engineering staff can provide complete engineering services to support conceptual product assignments. The **Global Medikit** R & D team focuses on critical healthcare problems and finds effective product solutions.

GLOBAL MEDIKIT PRODUCTION

State of art tools, robotics and statistical process controls are routinely used throughout the product development and manufacturing process. In its quest for quality, **Global Medikit** has successfully implemented a Quality Management System satisfying Quality System Standards of EN ISO 13485:2016 / DIN EN ISO 13485:2016 and Regulation (EU) 2017/745 on Medical Devices. These certifications have been confirmed by TÜV SÜD Product Service GmbH, Ridlerstrasse 65, 80339 Munich, Germany, a leading international certification organization.
